

GPV Asia is looking for

Asst. Lean & Six Sigma Manager

This Position Reports to: Operation Manager.

Reporting to this Position: Lean and Six Sigma team members.

Prime Function:

The position's main responsibility is to facilitate the development and implementation of significant process improvements within GPV Asia and when necessary to aid vendors with their processes that directly affect the company's ability to deliver to its customers. The focus of this position is to eliminate waste through the use of lean principles and Six Sigma methods. Also, this position is responsible for tracking and reporting all project progress, successes and failures.

- Production layout
- Line balancing
- Ergonomic analysis (Motion study)
- Improvement of handling methods (tray or trolley, etc.)

Responsibility:

When not working on improvement projects, the employee is the company's expert on Six Sigma methods and lean principles. The employee provides training to all staff on the methods and practices for improving processes, eliminating waste, decreasing cycle time, improving customer service and adding profit to the bottom line. This includes using tools such as value stream mapping, Kaizen events, root cause analysis and the training of Six Sigma Belts. Always strictly complied with Company's management systems and regulations.

Skills and Abilities:

The candidate should have the ability to lead others and facilitate projects from start to finish. The employee should have good communication skills in English, both oral and written, strong analytical skills, attention to detail and the ability to multi-task.

A person who wants to be successful as a lean manufacturer should have strong skills in training other people.

- You should be equipped with strong communication skills as well as the ability to constantly interact with people you are training/leading.
- You should be a self – motivated person.
- You should possess leadership skills and be willing to drive innovation and change.
- You should have strong computer knowledge, especially in the use of Microsoft Office.
- Public speaking, interpersonal and written communications skills are also a must in this profession.
- You should have an eye for detail and be willing to work in a fast-paced environment.
